

**COVID-19:
Updates for Healthy Texas Women and Family Planning Program**

Coronavirus disease (COVID-19) testing is now a covered benefit in Healthy Texas Women (HTW) and the Family Planning Program (FPP). Telehealth and telemedicine services are also authorized for HTW and FPP providers. Program recipients should check with their health care provider for more information.

Because of the COVID-19 pandemic, current HTW recipients will have their benefits renewed automatically and will remain active throughout the pandemic. No further action is necessary at this time. Recipients will be notified by mail when it is time to renew their benefits. You do not need to call us.

For information about COVID-19, including how to find a testing site, call 2-1-1 and select Option 6. (Texas Health and Human Services offices are not testing sites.) You can also visit the [Texas Department of State Health Services COVID-19 webpage](#) for more information.
